FIFTIETH ANNIVERSARY

This price list is the one-hundredth, semi-annual issue and completes fifty years in business.

In the fall of 1866, the late T. S. Hubbard started growing Grape Vines and the plantings have increased until now we grow over two hundred acres annually.

It is our aim to furnish the best rooted vines that can be produced and graded to a uniform standard. The many thousands of vines growing in every grape section testify to the high quality and productiveness of our roots.

We thank our many customers for their patronage, which we appreciate and are pleased to say we still receive orders from several nurseries who were among the first to trade with us.

We have the largest stock in America and with our modern, concrete storage-cellar and packing-house can fill all orders very promptly.

We solicit an order during our Anniversary Year from those who have not dealt with us in recent years.

Through our immense business and wide acquaintance we have established a national reputation for accuracy in varieties, grading to the highest standard, and promptness in filling orders, of which we are proud, and which it will always be our aim to deserve.

We call special attention to our large and fine stock in Currants, Gooseberry and Blackberry root-cutting plants.

We urge early orders to insure their being filled in full before our assortment is broken.

COPY OF CERTIFICATE OF INSPECTION

A Certificate of Inspection will be sent with every shipment and where State laws require it stock will be fumigated with hydrocyanic gas of the strength usually employed for that purpose.

FOR HURRY ORDERS

Long Distance Telephone in our Office connecting with all parts of the country.

In ordering by Telegraph use American Association of Nurserymen Telegraphic Code.

NEW GRAPE

It is very fitting that in our Anniversary Year we announce the introduction of our new grape

“HUBBARD”

named in honor of the late T. S. Hubbard, founder of this Nursery and who did so much in the interest and advancement of the American Grape.

DESCRIPTION.

The Hubbard Grape originated in 1903.

Color, black. Clusters good size and shape. Berries large and uniform, averaging with well-grown Concord. Adheres well to stem. Skin thin and tough. Does not crack easily. Seeds few and small and separate easily from pulp. Sweet, juicy, best quality, approaching Vinifera. Ripens about ten days before Concord.

We have investigated many new grapes in the past ten years and found no other grape with so many excellent points.

The Hubbard grape being of better quality, a better shipper, better size, healthy foliage, strong grower and earlier ripening makes it a more desirable grape to plant than either Concord or Niagara.

No vines offered, or orders booked, this spring. Further notice and full particulars will be made later.
